

# How to do Cloze (5 Steps)

1) **Don't guess** – if you are unsure of a CLOZE; then leave it out and come back to it later. Otherwise a wrong guess will mean future mistakes on other CLOZES. You may also want to skim through the whole passage to see what it is all about.

2) From the blank, work out whether you need a **noun** (thing or idea), **verb** (doing or being word), **adjective** (describing a thing or idea) or a **adverb** (describing the verb). You may also need a connective (joining word) or Preposition (relationship word)

3) When you choose a word make sure it **makes sense grammatically** (e.g. tenses match)

4) When you choose a word make sure its **meaning fits with the context** of the sentence.

5) Finally once you have filled all the words – **read through the passage again** this time with all the words to make sure everything fits perfectly.

Fill in the missing blank making sure that the **sentence makes sense**
