Find the missing angle measurement in each set

Find the missing angle measurement in each set

Find the missing angles below

Find the unknown interior angle for each triangle.

Find the unknown angle in each quadrilateral.

- 1) Answer C – “divide his assets among his three sons, keeping a very small part“(paragraph 1). Make sure you read the full paragraph rather than answer from memory.
- 2) Answer C – “promised that it should be well and properly employed“(paragraph 2) Make sure you read the full paragraph rather than answer from memory.
- 3) Answer A – The root word for entrust is trust. Entrust means to put someone or something in another’s person’s care.
- 4) Answer A – “The sons thereupon departed, and travelled for three months” (paragraph 5)
- 5) Answer B – Restrained means to hold back. (This word is on the LifeChangingTuition.com 11+ vocabulary list). The second son did not hold back but was brave. All the other words were synonyms for the word brave.
- 6) Answer D – Here you have to follow the process of elimination. Go through each son’s journey in the passage and check if they have displayed the relevant moral lesson. Watch out as one son has displayed more than one moral lesson i.e. the third son displayed moral lessons B and C (By saving the life of his enemy). The first son displayed moral lesson D. (By being honest and not stealing any of the jewels)
- 7) Answer C – Again make sure you look for evidence. In paragraph 2 it mentions “promised that it should be well and properly employed”. Options A, B, and C all seem plausible but are not mentioned in the text.
- 8) Answer D – Trick question. Answer A you can eliminate as there is no evidence. Answer C you can also eliminate as the second child also saved a life. B seems the obvious answer but it is a trap. The father was describing whether the actions (or deeds as used in the passage) as being noble or not noble. But Option B is implying that the sons themselves were either not noble or noble.
- 9) Answer A – Noun is a naming word. Life is a common noun.
- 10) Answer A – Metaphor is when comparing two things or actions using the word ‘is’: “for it is a noble and godlike thing to help an enemy”

- 1) troubled
