- 3) b
- 4) d
- 5) C
- 6) C

Arrow heads

- 1) B
- 2) C
- 3) B
- 4) A
- 5) B

A hugely popular form of entertainment, electronic games are games run by computer. They are also called video games. The appeal of electronic games has grown as the technology used to produce them has advanced, offering players increasingly sophisticated graphics and sound. Electronic games are played on personal computers, home video consoles connected to television sets, arcade consoles, handheld devices, and even cell phones.

There are thousands of electronic games in many genres, the most popular of which include action, adventure, and sports. Many games are played by one person against the machine. Some games, such as simulated sports contests, can be played by two or more people competing against each other. Other games allow thousands of people to play at once over the Internet.

Electronic games are operated by a small computer called a microprocessor. The microprocessor runs a program, or set of instructions, that controls what appears on the screen and what sounds the game makes. Home video game consoles are hooked up to a television set for display. A computer displays games directly on its screen. Games are stored on special cartridges, compact discs (CDs), or digital video discs (DVDs). The games with the most advanced graphics and sound are on DVDs, which can hold the most data. The player usually operates the game with a lever called a joystick or with buttons on a control pad.

Shuffle

1. an

The words can be rearranged into the sentence 'I wear a watch to tell the time.'

2. splash

The words can be rearranged into the sentence 'The children laughed as they swam round the lake.'

3. always

The words can be rearranged into the sentence 'Dad never does anything around the house.'

4. from

The words can be rearranged into the sentence 'Patrick used to eat salmon sandwiches every Saturday.'

5. break

The words can be rearranged into the sentence 'Be careful making wishes in case they come true.'

6. hers

The words can be rearranged into the sentence 'They never knew that it was me who took the ball.'

7. where

The words can be rearranged into the sentence 'They left me alone in the park yesterday afternoon.'
